👤 About Me

A developer with hands-on experience in backend development, machine learning, and cloud infrastructure. Skilled in Python, MySQL, Docker, and basic CI/CD pipelines. Built several personal projects involving RESTful APIs, data processing, and ML models. Eager to grow as a Backend, AI, or DevOps Engineer and contribute to scalable and impactful tech solutions.

🧩 Skills

- Languages: Python, C++, SQL, JavaCreativity

- Technologies: Stringboot, React, React Native, Docker, Git

🎓 Education

Bachelor of Science in Information Technology
University of Engineering and Technology VNU — 2022 - present

I am currently in the final semester of my third year, majoring in Information Technology at the Faculty of Information Technology .

GPA: 3.22

💼 Projects

Q Airline: A full-stack web application — 2024

- Built with a Dockerized environment for easy mock deployment
- Implements RESTful API, authentication, and booking logic

English Learning App: A desktop application — 2023

- Features two types of dictionaries: English–Vietnamese and Vietnamese–English
- Designed intuitive UI to enhance learning experience

SingApe App: A mobile music streaming application with rich features. — 2025

- Background playback, real-time synced lyrics (karaoke mode), music charts
- Built with React Native, Tailwind CSS (Gluestack), and FastAPI backend

Plane Invader Game: A 2D shooting game — 2023

- Background playback, real-time synced lyrics (karaoke mode), music charts
- Built with React Native, Tailwind CSS (Gluestack), and FastAPI backend

Note : The project details are available at ltthuc.id.vn

📖 Knowledge

- Basic understanding of programming with at least one language (Java, Python, JavaScript, C++)
- Fundamental knowledge of Application Development
- Proficiency in Linux (Ubuntu) and Git
- Basic knowledge of Docker deployment, GitLab CI/CD setup, and system monitoring with Zabbix.
